**Refresh** 

Steam Only Program For Special Clothes. Occasion wear, one time worn clothes (office wear), soft toys, shawls, etc can be refreshed from the comfort of home

Spin & Dry

Spin & Dry only program that lets you dry even your hand-washed clothes. You can also choose steam as an option to help reduce wrinkles while drying. Choose from multiple drying modes according to your convenience.

Dry as you like it

Sun drying is a challenge in today's world. Sometimes there's no space, sometimes there's no sun. And sometimes you need to dry clothes in a hurry! Protect your clothes from outdoor pollution and germs too!

Your 3-in-1 Laundrimagic will give you 100% dry clothes at the press of a button. Multiple drying options will let you choose how dry you want your clothes, from iron dry to cupboard dry!

Dry

Did you know?

Clothes dry best when there is enough space in the drum for them to toss and turn freely. For best results, don't overload the machine. Remember to check the wash care tag!

CUPBOARD DRY

Ready for storage
100% dry clothes

Limit large items like towels to 2-3
Keep sufficient gap in the drum
for optimum performance

GENTLE DRY

For sensitive garments
90% dry clothes

Low temperature drying for heat sensitive,
synthetic fabrics. Limit the load to 2 Kg.

TIME DRY

Lets you customise the drying
time as per your load

If low time is selected for a high/heavy
load then the clothes may come out half
dry. For heavy load, set more time and for
a light load, less time.

ECO DRY

Energy saving mode
100% dry clothes

Limit large items like towels to 2-3
Low temperature drying saves electricity—
do not overload the drum for optimum
drying performance

Available on
My IFB App

IRON DRY

Ready to iron
90% dry

Clothes will come out slightly
damp/moist so that they
are easy to iron

KEEP SAFE!

After the drying cycle is completed, the
drum will cool down. This is indicated as
'Cd' on the display panel. Don't touch the
hot drum till this indication is on.

Refresh

Take your clothes to the spa!

This steam only wash cycle is perfect for special clothes—favourite party dress etc

The program uses only **STEAM** to freshen your special clothes like your favourite party dress, formal office wear worn once, baby's stuffed toys, shawls, an overcoat or anything that you would not want to wash with water.

Add Sensora, fragrance to get aromatic treatment while refreshing your laundry (as shown in the image), just 40 mins and you're done.

Select the program → Pour Sensora in REFRESH chamber.
Limit the load 2-3 items...to witness the magic!
